## BACKGROUND

Comatsi Circle (PTY) LTD was established in 2013 through the vision of a very audacious and ambitious individual who saw an opportunity within the construction business sector and seized the prospect. The business has grown from strength to strength since its inception, acquiring more knowledge and skill-set from each project we have handled.

The market for construction in the local market is saturated with contractors coming from other regions and they do not employ local artisans to which will be beneficial not only to the local economy but that of the country's economy as well.

### VISION

To improve our environment by providing an environmentally friendly civil infrastructure and allied trades in a cost effective manner mindful of the effect of the same on greenhouse emissions thereby ensuring improved livelihood for the people and the country as a whole.

We pride ourselves in that we employ local individuals who are skilled to maintain a high level of quality and workmanship. The founder of Comatsi Circle (PTY) LTD has vast experience in the construction business having worked for other companies and hosting other companies as the main contractor. What sets us apart from our competitors is the fact that we gradually empower our team with the latest skills, trends and technology within our industry whilst keeping our service offering within our client's budget.

## MISSION

To provide dwelling houses, roads, bridges including construction and welding and transport by using the abundant manual and skilled and semi-skilled Labour available in our communities at affordable cost to our clients.

To address the rampant unemployment within our communities by recruiting from within the communities and also procure from black owned businesses on preferential basis thereby promoting economic empowerment in the community.

## SAFETY, HEALTH AND ENVIRONMENTAL MANAGEMENT

Comatsi Circle (PTY) LTD's safety, health and environment (SHE) policy and practices centre around a zero-harm philosophy towards people, host communities and the environment.

Our company is committed to maintaining a clean environment and as a result believes this will create the ability to operate in a disciplined and sustainable manner over the long term which is fundamental to maintaining a competitive advantage and honouring the deliverables of corporate governance.

# SERVICES
